

Vacancy

Project Development Director

Erasmopower2X builds on the strategic and technological expertise of its founding partners Power2X and Soto Solar to develop a giga-scale solar power and green hydrogen project in central Spain. The Project Development Manager will bring the complex project from concept to operational success with their team through highly effective project management, risk mitigation, and stakeholder relations.

Requirements

- Over 12 years of experience
- Managing large-scale technical projects in Spain
- At energy or petrochemical companies
- Engineering background
- International experience
- Fluent in Spanish and English

 Madrid

 Minimum of 12 years' experience

About the company

ErasmusPower2X

ErasmusPower2X is developing one of the largest hydrogen projects in Europe that will accelerate the Spanish energy transition, and ultimately supply the European market for green molecules. Established as a partnership between Dutch developer Power2X (a renewable energy consultancy founded by ex-McKinsey Partners) and Spanish solar power project developer Soto Solar in 2023, the company will realize a 1.2 gigawatt solar plant and integrated plant in Castile-La Mancha to produce fifty-five thousand tons of green hydrogen per year with the possibility to further expand. The one-billion-euro project will supply Spain's local heavy industry first, reducing CO2 emissions by an estimated one million ton per year and decreasing local gas demand.

Working at a European pioneer in green hydrogen

ErasmusPower2X is set up for success as a renewable energy pioneer in Europe thanks to the company's unique blend of assets. Through its partners Power 2X and Soto Solar, the company builds on their vast expertise in renewable technology and project development as well as access to capital from long-term investors. All involved partners have the strategic vision and required risk appetite to develop this project and operate the plants and assets for decades to come.

The dedicated team in Madrid is growing quickly as the project develops. From the current team of a few highly experienced professionals working with a technical team of hydrogen experts, Erasmopower2X plans to employ more than fifty people, mostly in project management and finance. The company nurtures an agile and collaborative culture to facilitate the flexibility and partnership required to build the new green hydrogen frontier. ▶

Vacancy

Project Development Director

The Project Development Director realizes Erasmopower2X's ambitious project from concept through to operational success. Together with their team and partners, they design the plan to build the solar power plant and integrated plant, identify the risks and set up a mitigation strategy, proactively handle changes, manage the internal and external stakeholders, and lead the project through its successful construction. The Project Development Director reports to the CEO of Erasmopower2X, Bas Dekkers, and builds a team of project experts in Madrid.

Excellent project management with agile risk mitigation

The Project Development Director leads the development of the integrated green hydrogen production facility, ensuring the project meets the strategic, financial, and operational goals. They understand every critical detail of the project and monitor risk areas closely to ensure timely and within-budget delivery, even when the plan needs to be adjusted to changing circumstances. The Project Development Director solves issues together with their multidisciplinary team and knows exactly when to pivot and which effective tools to employ. They develop, coach, and mentor the team, nurturing Erasmopower2X's entrepreneurial, agile way of working. Finally, the Project Development Director also engages with external stakeholders, including regulatory bodies and industry partners, to ensure the project's success. ▶

This is an exciting opportunity for an entrepreneurial and experienced project manager who is eager to be at the forefront of the energy transition in Spain as part of a nimble, yet well-equipped company. The Project Development Director is critical for the successful realization of Erasmopower2X's one-billion-dollar project. Their deep knowledge of the Spanish energy and/or petrochemicals market, their international experience, and their excellent stakeholder and regulatory management will be pivotal to turn Erasmopower2X into a key supplier of green hydrogen in Spain and beyond. ■

Erasmopower2X is working with Top of Minds to fill this vacancy. To express your interest, please contact Ana Moya Morales at anamoyamorales@topofminds.com.

“The Project Development Director gets everything done that this sizeable and complex project needs without necessarily having a blueprint that tells them how to do it. It is more than that, though. It is building and coaching a stellar team and working with external stakeholders who have a keen interest in the project. It is applying their expertise in novel ways and figuring out how Erasmopower2X can achieve this next frontier.”

– Bas Dekker, CEO of Erasmopower2X
