Ernst & Young is a global consultancy firm realizing impact to build a better working world. Their Supply Chain & Operations consulting services team is now hiring a Senior Manager to be the lead in long-term programs to digitize manufacturing.

About Ernst & Young

Ernst & Young (EY) has the global scale, support, inclusive culture and technology for consultants to have an individually shaped career. The unique voice and perspective of each individual is counted to make EY become better.

EY's clients operate in a world where achieving and sustaining performance is more difficult than ever. Consulting professionals at EY help clients grow and turn their strategy into reality. They work with high-performing teams that drive growth and deliver great client service. Consultants play their part in building a better working world. The strength of EY's global network, combined with local empowerment and a relentless focus on winning in specific markets, means that every employee will gain valuable experience across different geographies and sectors.

The Supply Chain & Operations (SC&O) consulting services team supports clients to seize opportunities to grow the business safely while addressing the complex problems that can arise. The Digital & Manufacturing Excellence team within SC&O focuses on long-term client support in extensive programs that deal with digitizing and optimizing manufacturing. EY is now hiring a Senior Manager of Digital Manufacturing to lead these types of programs.

VACANCY

Senior Manager of Digital Manufacturing

The Senior Manager of Digital Manufacturing helps clients to understand how technology can provide value to drive their business strategies.

The Senior Manager will lead teams in delivering digital solutions and programs that unlock significant value by addressing clients' critical issues. They are a people leader who will mentor, coach and counsel team members. The Senior Manager helps EY to build an inclusive culture and ensure high-performing teams.

The Senior Manager uses domain knowledge, technology experience and skills to provide technology consulting service. They work closely with client counterparts (C-suite level) to optimize operational efficiency and improve performance. The transformations fix the foundational systems and bring new innovations like Industry 4.0. The technologies are embedded in the day-to-day business.

“Digital transformation in manufacturing is a rapidly growing field. The Senior Manager will have plenty of opportunity to further develop the skillset to keep up with the ever-growing demands of the digital landscape.”

Anjo Wiegerinck,
Associate Partner Supply Chain & Operations at EY

The Digital & Manufacturing Excellence department often works with larger clients on multi-year engagements, so it is essential for the Senior Manager to build good relationships and to manage a wide range of stakeholders. The team has, for instance, just started a long-term transformation engagement with a European producer of consumer products and a global life science company in which the Digital & Manufacturing Excellence team will provide support with all kinds of activities – from analyses to program and project management – to optimize their manufacturing.

The Senior Manager enhances the EY brand externally. They stay up-to-date with the latest trends in the digital manufacturing domain to be a trusted advisor and subject-matter resource. The Senior Manager builds pipelines and drives further sales, working closely with client account teams and domain leaders – from CIO to business plant management and manufacturing leads.
